

CUTTING EDGE SECURITY AND EMERGENCY RESPONSE

# Emergency Phone + Autonomous Drone Integration

Experience the future of emergency communication and security with the groundbreaking partnership between Talkaphone and Sunflower Labs. By integrating Talkaphone’s trusted blue light emergency phones with Sunflower Labs’ AI-powered security drones, this collaboration delivers real-time situational awareness and rapid response capabilities. A single Bee autonomous drone can support a network of emergency phones, covering up to a 600-meter radius from the Hive—over 250 acres. Streaming real-time video through open protocols, the system integrates seamlessly with existing security infrastructure. When an emergency call is placed by pressing the button on the blue light phone, the Bee can be deployed to surveil, enhance visibility, and provide a safety escort while help is on the way. This innovative solution will transform security for campuses, communities, and public spaces, ensuring proactive protection like never before.

HOW IT WORKS

- 1 User presses the button
- 2 Drone is deployed to blue light phone location
- 3 Drone keeps eyes on the scene while responders are en route

## System Features

- The fastest drone deployment on the market
- From alert to flight in less than 5 seconds
- Observe anything on a 30 acre property in under 1 minute
- Covers up to 600m radius from the Hive - over 250 acres
- Integrated rapid recharge system

## Ideal For

- Emergencies
- Safety escorts
- Vehicle breakdowns
- Medical emergencies
- And more!

THE SYSTEM

### Bee

Designed for safety and performance, the lightweight drone features sophisticated technology for autonomous flight, high-quality video capture and accurate landing and charging, each and every time. Video from the Bee is streamed using standard RTSP and ONVIF protocols.

### Hive

The Hive not only houses and charges the Bee— it’s the brains of the system, processing and analyzing sensor data using state-of-the-art embedded AI computing.

### Blue Light Phone

Immediately recognizable, reliable, and accessible, the Blue Light Phone serves as the point of connection for drone deployment and connection with emergency services.

### Software

The software solution enables set up, control and overview of the Bee and Hive system. It works on any mobile device or web browser. It’s embeddable and easy to integrate using the open API.
