

FOR IMMEDIATE RELEASE

April 6, 2018

**The expanded Via Series product launch from
Talkaphone at ISC West '18**

Announcing Via Series product line debut:

Last year at ISC West '17 Talkaphone presented the awarding winner Via Pedestal. This year, Talkaphone will debut the five product Via Series, an architectural designed line for modern entryways and facility use. It is the newest in access control and emergency communication.

The product line includes: The Via Pedestal, Via Access Wallmount, Via Mass Transit Wallmount, Via Wayfinding Assistance Tower, and Via Entry.

All Talkaphone products are durable, vandal-resistant and designed to resist extreme weather conditions. The Via series have been constructed of a steel body with a marine grade stainless steel front IP66-rated and comes in deep, high gloss black finish. Patented design by Talkaphone in USA, Canada, and Europe.

The Via is a connection point between you and the world. With the Talkaphone communication technology behind it, you are reliably connected. The expanded Via series for any connection point is now available as a communication pedestal or wallmount.

**Demonstration of the new line and product information can viewed at
ISC West '18 at Talkaphone booth #23109.**
