

TALKAPHONE SOLUTIONS

Having 100 towers and 300 wall mount phones on campus, Talkaphone solutions are heavily deployed in parking garages – on every floor and stairwell. Emergency phones are also found at the entry of residential halls providing building access control, along with towers throughout campus that deter crime with its presence.

“Without a doubt, safety is a priority on our campus and that’s our mission, to provide a safe and secure learning environment. With our expansion, we now have three different substations that our officers can work out of. Talkaphone’s emergency phones are a spoke in the wheel that enhances our efforts to ensure campus safety.”

– Doug Schwandt, Chief of Police

FUTURE PLANS

As they conduct their twice a year safety initiative walks with the student association, Schwandt highlights that they,

“Walk the whole campus at night looking for areas that might need enhanced lighting or another emergency phone.”

With monthly checks conducted by the University’s Police Department, a report is generated highlighting which units need to be repaired or replaced. Every time the University has a previous unit fail or need additional coverage, they trust Talkaphone first.
